LAP Lambert Academic Publishing. Paperback. Book Condition: New. Paperback. 404 pages. Dimensions: 8.7in. x 5.9in. x 0.9in. American philosopher Everett W. Hall (1901-1960) was among the first epistemologists writing in English to have promoted representationism, a currently popular explanation of cognition. According to this school, there are no private sense-data or qualia, because the ascription (representation) of public properties that are exemplified in the world of common sense is believed to be sufficient to explain mental content. In this timely volume, Walter Horn, perhaps the foremost living expert on Halls philosophy, not only provides copious excerpts from Halls works in epistemology, metaphysics, and the philosophy of language--as well as his own commentaries on those writings--but also includes articles by Richard Rorty, Amie Thomasson, Thomas Natsoulas, and Romane Clark that are pertinent to Halls unique blend of linguistic idealism and intentional, common-sense realism. Covering metaphilosophy, the intentionality of perception, naive realism, linguistic relativism, and Halls public disagreements with such luminaries as Moore, Carnap, Wittgenstein, Quine, and Sellars, *The Roots of Representationism* is essential reading for students of 20th Century analytic philosophy.
