Report of the Drainage and Flood Control Investigations in the James and Big Sioux River Valleys (Paperback)

By South Dakota James Commission

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: .Valley it is only necessary to clear the channel of trees and deadfall and to make an occasional cut-off. Through the southern part of Brookings County, however, the construction of an entire new channel is required for some distance. 10. Intercepting ditches will provide relief for parts of the valley. Several ditches have been planned along either side of the valley to intercept flood waters from the uplands, thus preventing the flooding of large areas of bottom land lying between the bluffs and the river. Portions of these ditches may be constructed most economically in conjunction with highways. 11. Three natural reservoirs can be utilized which will provide a total capacity of approximately four and one-half billion cubic feet. Lake Kampeska and Lake Pelican are so located that it would be difficult to prevent flood waters from flowing into them. By slight improvement, however, their capacity...
